

Rules re: Smoking by Artists On stage

1. The PAC license agreement with presenting organizations will communicate to producing entities that we expect to be notified, on confirmation of the engagement, if smoking on stage will take place as an integral part of their act.
2. If this is the case, our Technical Services department will consult with campus Facilities to determine if there is a methodology with the HVAC system to limit smoke reaching the audience.
3. If we know that smoking will occur far enough in advance, we will insist that this notification be made in all event advertising.
4. If informed in advance, we will post signs in the lobby and/or in the printed program, advising patrons.
5. If told of their concern in advance of a performance, or before intermission of an event where an artist is smoking, we will process refunds for patrons who may be bothered by this fact.
